(54) COATING UTENSIL

(57) Abstract:

PROBLEM TO BE SOLVED: To easily put out coating liquid when the coating liquid is caused to flow out and to firmly grip a container without the coating liquid flowing out when coating with rubbing and sweeping is performed with respect to a coating utensil.

SOLUTION: In a coating utensil which is provided with a container 2 for coating liquid and a brush part 8 provided on an opening part 2a of the container 2 and in which the container 2 is pressurized to supply the coating liquid to the brush part 8 to perform coating with rubbing and sweeping to a body to be coated by the brush part 8 containing the coating liquid, a thinwalled pressurizing part 10 is formed in the vessel 2 and also a thick-walled gripping part 12 is formed near the opening part 2a of the container 2.
